A	B	C	D
Content Type	Reach	Impressions	Engagement Rate
Photo 1	6563	6800	2.10%
Photo 2	384	420	1.80%
Photo 3	448	500	1.90%
Key Insight:			
Top photo reached 6,536 users while others averaged ~400. This 16x variance shows Instagram's 2026 algorithm is inconsistent for static posts. High-performing photos likely had better hooks, hashtags, or posting times.			
Recommendation:			
Analyze the 6,536-view post for hashtags, time, and caption style. Replicate that formula. Test converting photos into 5-sec Reels with trending audio to bypass static-post limits. Post 7-9 PM IST.
